## PROFESSIONAL SUMMARY

Product Analyst with experience in **product strategy, metric definition, and A/B testing**. Semi-Finalist, **American Express** Product Analytics Track. Eliminated a **19.7% silent product vulnerability** at Diversio through data-driven advocacy and authored PRDs optimizing user-accepted workflows. Driven to build transparent, user-centric data products using **Python, SQL, and FastAPI**.

## EDUCATION

**Netaji Subhas University of Technology (NSUT)**, Delhi — **Aug 2023 – May 2027**
*Bachelor of Technology (B.Tech) – Instrumentation and Control Engineering*

## WORK EXPERIENCE

- **Diversio Ltd.** – *SDE Intern* | **Project** — *Remote*
  *HRIS Import Validator & Org-Health Analytics (Python, FastAPI, pytest, GitHub Actions)* — *Aug 2026 – Present*
  - **Product Delivery & Impact:** Launched an impact-ranked review queue with confidence-tiered fixes, reconnecting isolated employees and raising data quality from 93.8 to 96.8.
  - **Strategy & Experimentation:** Authored a PRD defining north-star metrics and A/B tests; optimized model threshold to 0.80, trading 6% coverage to cut incorrect user fixes by 90%.
  - **User Insights & Advocacy:** Identified a 19.7% silent failure rate in sequential IDs, successfully advocating for a product-level template change that eliminated the vulnerability.

- **CSIR-National Physical Laboratory** – *Research & Development Intern* — *Delhi, India*
  *Instrument Automation & Pipeline Development (Python, PyVISA, SCPI)* — *May 2026 – Jul 2026*
  - **Instrument Automation:** Built a Python app (PyVISA/SCPI) with a three-tab GUI, replacing a manual LabVIEW workflow for temperature-capacitance measurements.
  - **Researcher Workflow:** Removed manual handling via structured CSV logging, providing a single report view and surfacing failures early to save experimental hours.
  - **Product Impact:** Processed 134k measurements across 57 sessions, improving data consistency 125x and surfacing a significant correlation ($r = 0.959$).

## PROJECTS

- **Parakh: Investment Practice Platform** | *React, FastAPI, English and Hindi* — **GitHub**
  - **Product Strategy & User Loop:** Executed an evidence-led pivot from stock signals to an index-benchmarked practice time machine; designed a market replay loop with personalized report cards based on user playtests.
  - **Product Transparency:** Championed a user-centric experience by removing misleading labels, deprecating a news module over licensing terms, and disclosing data caveats across 46 documented product decisions.

- **TalentScout: AI Hiring Assistant** | *Python, FastAPI, PostgreSQL, Groq LLM, Docker* — **GitHub**
  - **Platform & User Experience:** Launched a multi-tenant AI hiring platform automating first-round screening via LLM parsing, adaptive assessments, and ranked recruiter shortlists.
  - **Explainable Ranking & Trust:** Designed transparent rule-based job-fit scoring where AI bias/integrity signals appeared as review flags rather than hidden penalties, halving the non-native English scoring gap.

- **Delhi Air Quality Analysis** | *SQL, Python, FastAPI, Plotly, MapLibre, Docker* — **GitHub**
  - **Product Thinking & Metrics:** Designed a "bad air tomorrow" alert by defining a success metric (first-bad-day recall) and strict guardrails ($\leq 4$ false alerts/month), warning users before 69% of bad days.
  - **Dashboarding & Insights:** Shipped a live FastAPI + MapLibre dashboard with a CPCB health-advisory board; proved winter smog is weather-driven (emissions only 9-17% above baseline).

## TECHNICAL SKILLS

- **Languages & Tools**: Python, SQL, C++, Pandas, NumPy, Plotly, FastAPI, Excel, LLM APIs, Git, Docker, GitHub Actions
- **Product & Analytics**: A/B Testing, PRD Writing, Metric Design (North-Star, Guardrails), User Segmentation, Funnel Analysis

## ACHIEVEMENTS

- **Semi-Finalist, American Express Product Analytics Track:** Analyzed clickstream and behavioral data in Python and Pandas, answering 6 business questions on conversion and segmentation.
- **EY Techathon 6.0 (Advanced to Round 2 – BFSI, Tata Capital):** Defined metrics and created synthetic datasets for a 4-member team building an agentic AI loan-sales chatbot via LangGraph.
